**UAV developers face major challenges in developing regulatory standards, especially with regards to airspace coordination and control.**

**UAVS is ideally positioned to be the UAV industry's key point of contact with government and regulators.**

**The Association has worked hard to gain recognition as a key player in discussing the major regulatory challenges and has developed strong relationships with key decision-makers in government and civil regulatory bodies.**

**UAVS is run by and exists purely to serve its membership's business interests. The members set the agenda and through collaborative approaches reap the benefits.**

***Gary Clayton***  
***EADS Defence & Security***  
***UAVS Chairman***

# Industry Position

- UAVS is the UK Trade Association dedicated to UAVs and their future
- It was the driving force behind UK UAV civil operations research programme, ASTRAEA
- It stimulates business growth through networking and collaboration

# Membership Benefits

- Representation at Government level
- Networking towards future Business Opportunities, e.g. ASTRAEA 2
- Access to Key Decision Makers, Regulators and Certification Agencies
- Self Promotion within Membership
- Business Advice Line
- Access to UAS Industry Events and Group Discounts
